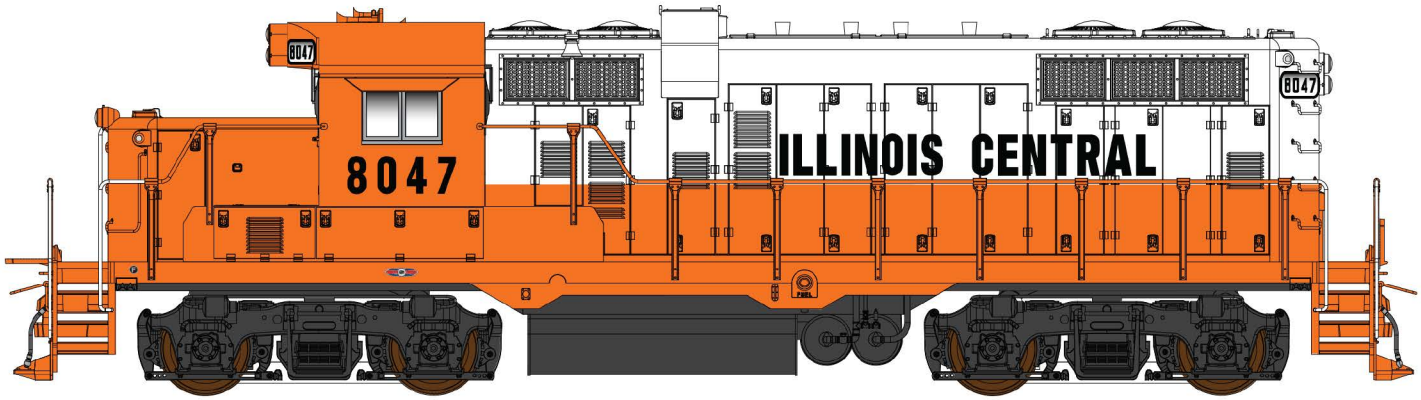
November 2017
DEALER ANNOUNCEMENT

N Scale GP10 Locomotives

ADVANCE RESERVATION



The HO GP10 was so successful and there was such an outcry from seemingly neglected N scale modelers that we were motivated to produce these popular locomotives in N scale as well. This release includes eight of the colorful paint schemes that appeared on the HO Scale GP10 and will be followed by several more very soon. All items will include four road numbers, except in those cases where the owner had less than four of these locomotives. These models will replicate the prototype as closely as possible, including road specific details, etched metal grills, and laser sharp decoration. They will be available with ESU electronics for DC, DCC and DCC with sound.

HO Scale ES44 AC/DC LOCOMOTIVE DRIVE UPGRADE

All future releases of the early GEVO locomotives will be equipped with drives that have been modified to the same standard as the Tier 4 GEVO's that we have recently released. The drive will include a larger & more powerful motor, a heavier die-cast chassis, improved ditch lights, and HI-AD trucks with rotating bearing caps. We are still accepting advance reservations for several paint schemes of the ES44AC so send your reservations in soon.

HOLIDAY SALE!!

Our 2017 Holiday Sale will begin on Monday, November 13 and will include many items in both N and HO scales. These are items that have been available for more than a year and are being offered to our entire dealer network on a first-come, first-served basis. Call your InterMountain sales representative for details. The black and white pages for this month's Dealer Memo include a listing of all items available.

Frank Angstead

N Scale GP10 Paducah Locomotives

NEW MODEL ANNOUNCEMENT!

Announced: November 10 Reservations Due By: December 31 Available: July / August

List:

DC:	$159.95
DCC:	$199.95
DCC w/ Sound:	$259.95

Through the 1970s, the Paducah shops of the Illinois Central rebuilt worn out EMD GP7 & GP9 locomotives into the GP10. The InterMountain Railway Company N Scale GP10 locomotive will be manufactured with finely molded parts that have been designed to reproduce railroad specific details; such as HORST Air Filter, Horizontal Nose Headlight, Extended Right-front Tool Box, & Engine Access Hatches on the roof.

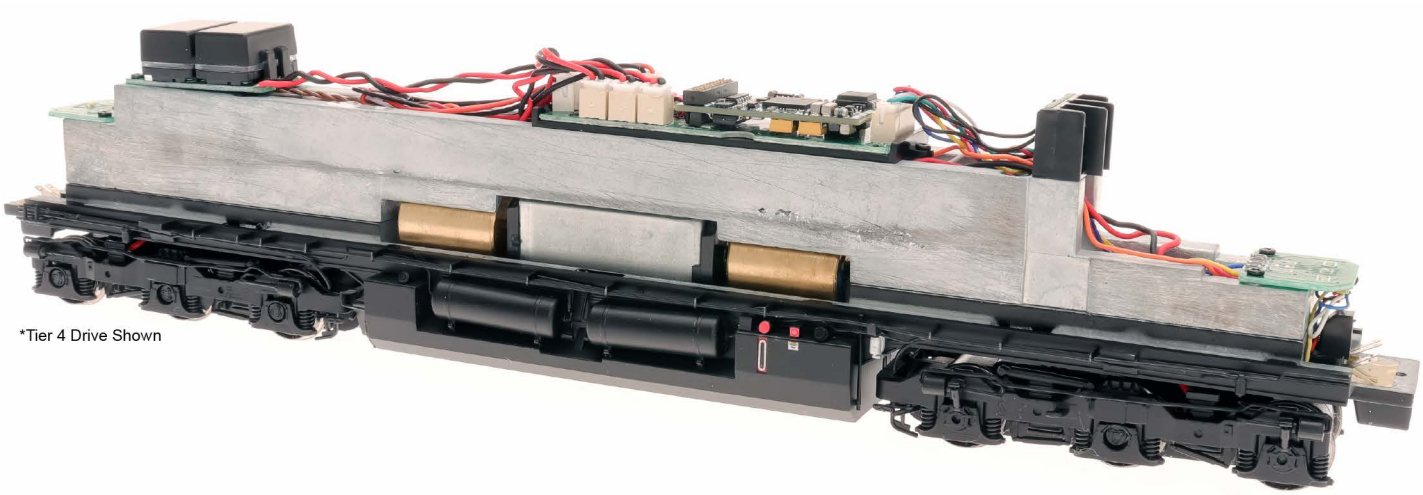
November 2017

ATTENTION GEVO MODELERS!

Customer response to our recently released ET44AC "Tier 4" GEVO locomotive's drive has been so overwhelmingly positive, we have decided to incorporate it's new improvements into the ***future production runs*** of our ES44DC and ES44AC locomotives. What this means for you is our upcoming release of ES44AC GEVOs will run well with our Tier 4 GEVOs, pull harder and look better. Here is a list of the key upgrades:



*Tier 4 Drive Shown

* **Larger, More Powerful Motor:** *The Tier 4 GEVO's motor is 45% longer than the existing ES44 motor. Larger magnets and a larger armature add up to more torque and pulling power*

* **Heavier Die Cast Chassis:** *Our Tier 4 is no lightweight, and now our ES44 locos will have similar heft. The extra weight will help transfer the new motor's power to the rails. It also improves electrical pickup from the rails.*

* **Hi-Ad trucks with rotating bearing caps:** *Moving bearing caps on all axles ends, even the ones behind the snubber mounting plates!*

* **Improved Ditch Lights:** *LEDs mounted in the Ditch Light housings. No light pipes make for brighter lights!*

The Future of Model Railroading

CabControl WIRELESS CONTROL SYSTEM

Welcome to the Future of Model Railroading! Simply with the touch of a finger you can have access to over 16,000 locomotives along with over 1,000 switches and other accessories!

- ✔ Completely wireless model railroad operation
- ✔ Ergonomic, Android based remote control unit with TFT Display
- ✔ Internal database capable of holding more than 16,000 locomotives with specific names and symbols and up to 28 functions per locomotive.
- ✔ Easy to create multiple unit consists Capable of configuring and controlling more than 1,000 switches and other accessories
- ✔ Conveniently updatable with internet connection
- ✔ Runs all DCC decoder equipped locomotives
- ✔ Automatic train detection using RailCom-Plus®
- ✔ Integrated 7A Booster

ESU Mobile Control II

- + Android operating system
- + ARM CPU, 512 MB RAM, 2 GB Flash ROM
- + 3.2" TFT Display, 800x400 resolution
- + Large Dial for easy speed control and direction change capabilities.
- + 4 user-personalized buttons
- + Micro USB port for Software Updates and battery charging.
- + 5-8 hours of battery life.
- + 3.5 mm stereo headset port (microphone & head phone)
- + Connects to all common WLAN access points

MSRP $499.99

ESULLC 23 Howard Street Montoursville, PA (570) 980-1980

ESU Integrated Control Unit

- + CabControl creates a wireless network for over 32 wireless controllers
- + Connects through your LAN to provide internet connection
- + USB Port for Software Updates and throttle charging
- + DC 5.5 mm / 2.1 mm socket for external regulated DC power supply
