

April 2019
DEALER ANNOUNCEMENT

HO Scale 4650 Cu. Ft. Hopper Cars **IT'S TOO LATE**

The current production run of 4650's is GONE. Every one of the ten releases is oversold and Advance Reservations are being taken for an expedited second run of these items with new car numbers before the end of the year. Ten additional road names have been added, three of which have never been produced by InterMountain before. That makes **TWENTY** paint schemes currently on Advance Reservation! Each paint scheme will feature six new car numbers. The reservation period ends on **June 1st**, so get your reservations in quickly. We want to place the order for this production run as soon as possible.

O Scale 50 TON BETTENDORF TRUCKS

The O Scale 50 ton Bettendorf trucks have been listed on the Advance Reservation form for the first time in several years. We have the mold for these trucks and are ready to produce them if the demand warrants it. We have had several requests for these trucks and are responding to the requests with this announcement. Please place your orders soon for this high quality item.

CONFIRMATION DEADLINES

We have found it necessary to strengthen our former lenient policy regarding confirmations. With great demand and limited product we no longer can allow production items to sit on the shelf for indeterminate periods of time awaiting confirmation. The current period for confirmations of Advance Reservations is two weeks from release of the Monthly Memo. When the memo goes out on Friday, confirmations will end two weeks from the following Monday. If you have special circumstances and this is a problem for you, please contact our Customer Service Department to work out a solution.

ACF 4650 Cu. Ft. 3-Bay Hoppers

The ACF 4650 Center Flow covered hopper was produced by American Car & Foundry starting in the mid 60's. Production continued into the mid 80's. Its unique design with no center sill and curved roof and body sides provided a car that "Filled Fuller and Emptied Emptier" than cars with center sills and flat sides. They were used for hauling grains and lighter weight minerals. In later years many were pushed into salt service. These cars were popular with many Class 1 railroads and a large number were used in lease services bearing ACFX reporting marks. **VISIT YOUR LOCAL HOBBY DEALER TODAY & BE THE FIRST TO GET THIS 2019 RELEASE**
