## NEW ITEM: COAL GONDOLA CONVERSION KIT!!

InterMountain now has available a conversion kit for all LBF, E & C Shops, and Hubert Manufacturing coal gondolas to upgrade the bolsters, trucks, and weights to InterMountain standards. Refer to the enclosed sheet for details.

Frank Angstead  
InterMountain Railway Company

# Coal Gondola Conversion Kit

InterMountain Railway is now offering a Coal Gondola Conversion Kit. This kit provides all of the items necessary to update older LBF, E&C, and Hubert brand coal gondolas to InterMountain specifications, improving the rolling qualities of the older cars. Included in the kit are two weights, a set of bolsters with details, two InterMountain 100 Ton trucks, and four screws (InterMountain wheelsets are sold separately). These components are the same as used on InterMountain's own cars, updating the older cars to match InterMountain cars in weight and truck quality. Installation is easily accomplished by removing the old bolsters and interior weights, replacing them with the InterMountain bolsters and weights (which double as the car's interior slope sheets), adding couplers of the modeler's choice, and attaching the trucks. Total conversion time, not including glue drying time, is just minutes per car. Modelers who desire to update their older coal gondolas to today's standards now have a solution to the issue that is both easy to use and affordable. Bolsters and details may need to be painted to match some roadnames. **Check with your local dealer today.**
