## 4785 PS2-CD Covered Hoppers

**ADVANCE RESERVATION**

Eleven paint schemes for the HO 4785 covered hopper car are now available for Advance Reservation. Eight of the decorative schemes are being done for the first time by InterMountain. These models are being produced with the prototypically correct hatch and gate combinations for each owner. All models feature laser sharp decoration, etched metal roof walks, metal couplers, precision InterMountain metal wheel sets. A number of these cars will also be offered "faded and patched". The Advance Reservation period extends through December 31.

These cars were produced in the 1960's and 1970's with Penn Central having the largest number of cars, a fleet of over 1,700. A number of cars were also leased to various grain elevators.

**HO**

## X-29 Boxcars

**NOW SHIPPING!**

This eclectic car is available in nine decorative schemes, one of which is being done by InterMountain for the first time. The Ferrocarril offering features two types of doors, each prototypically correct for its car numbers. First built in the 1930's, these cars ran in interchange service into the 1980's. These cars were seen in service in every corner of North America on every railroad due to the large number of cars in service. At one time Pennsylvania Railroad had 39,000 of the X-29's on its roster. These models feature laser sharp decoration, metal couplers, and precision InterMountain metal wheel sets. Shipping will begin the week of November 6.

**N**  
*Scale*

## R-70-20 Refrigerator Cars

**NOW SHIPPING!**

Eight paint schemes are available in this offering of this model. Three are being done for the first time by InterMountain. These cars were built in the 1960's for shipment of perishables and were used across the country into the 1990's. All models feature laser sharp decoration, precision InterMountain metal wheel sets, and metal operating knuckle couplers. They will be ready to ship the week of November 6.

A ninth paint scheme has been produced exclusively for Midwest Models ([www.midwestmodelrr.com](http://www.midwestmodelrr.com)). The white Union Pacific – ARMN has been done with a yellow replacement door with a prototypically correct road number. Contact Midwest Models for further information.

# 4785 PS2-CD Covered Hoppers - Early End Frame Version

**Announced: October 31    Reservations Due By: December 31**

**List: \$49.95**

**Features:** Etched Metal Roofwalks, Sharp Painting & Lettering, and Multiple Road Numbers. Equipped with InterMountain Metal Wheelsets and Metal Couplers.

Pullman Standard assembled 1,916 cars at the company's plant in Butler, PA from 10-1967 to 7-1972. Distinctive with 16 ribs along the side and 2/5 rivet pattern where the corner posts attach to the carbody. Penn Central was the largest customer for these covered hoppers, with more than 1,700 on its roster. With the demise of Penn Central, the rise and break-up of Conrail, these covered hoppers began to spread out in the 1990s to other railroads. In order to accurately capture the character of this era, InterMountain is approaching a number of these paint schemes as "Faded & Patched". Two of these new announcements capture the lineage of 3 or more of the predecessor railroads with New York Central, Penn Central, Conrail, CSX all being represented on one car. A number of these cars did make it out west post Conrail; Burlington Northern picked up a group of these cars and began patching and repainting cars throughout their service for the railroad.
