## **GP10 PADUCAH LOCOMOTIVES**

### **GOING TO PRODUCTION**

Fourteen paint schemes of the HO GP 10 locomotives are headed for production! In addition to the original ten schemes announced earlier, there have been four new items added to this production run, including, by popular demand, two new paint schemes for Illinois Central targeting different eras. The orange and white IC features an inset headlight. The "Operation Lifesaver" IC GP10 is a brand new paint variant with "Frog Eye" headlights. Both announcements represent the first time these detail configurations being offered in these paint schemes. All of these locomotives are finely detailed featuring road specific features, metal knuckle couplers and laser sharp prototypical decoration. Place your Advance Reservations for the four new items and increase the Advance Reservations for the original ten to fit your customers' needs. The Advance Reservation period will end March 31 so we can go into production!!

## **AAR 10'6" BOXCARS**

### **ADVANCE RESERVATION**

There are nine unique variations of this boxcar now available for Advance Reservations. Seven of these boxcars represent an underrepresented era; post 1970s. Shortened ladders and roofwalks removed were signature spotting features after 1965. While becoming a popular era for modelers, there are not many high-detail models on the market. To satisfy this demand, InterMountain delivers welded and riveted side boxcars with correct doors, matching the prototype. All these models are equipped with metal operating knuckle couplers, sharp, prototypical details, and precision InterMountain metal wheel sets. The Advance Reservation period for this unique model extends to March 31.

## **4750 CUBIC FOOT 3-BAY COVERED HOPPERS**

### **NOW SHIPPING!**

Six paint schemes are available to ship beginning the week of February 5th. One paint scheme debuts the new "Faded & Patched" series. Models in this series will better represent "In Service" equipment with faded colors, realistic distressed logos, and patched lettering. Three of the schemes are being produced by InterMountain for the first time. New details include optional roofline stiffener, option for large rope pull tabs, and short outlet gates. All these models have finely molded details, etched metal roof walks, operating metal knuckle couplers, and precision InterMountain metal wheel sets. Quantities are limited so be sure to confirm your Advance Reservations as early as possible.

## **SD-40-2 LOCOMOTIVES**

### **NOW SHIPPING!**

The first group of two road names are ready to ship the week of February 8th. The Santa Fe and the Milwaukee N SD40-2s each offer four road numbers. An additional 6 paint schemes with ditchlights will ship next month. Each model features finely molded and etched metal detail parts designed to reproduce railroad specific details. Please note that the DCC version of these models have been consolidated to the DC version. ESU has dropped the LokPilot 5 slide in decoder and we will not be able to offer a DCC non sound version for this model at this time. There are limited quantities for both of these locomotives, so be sure to confirm your Advance Reservations as soon as possible.

# GP10 Paducah Locomotives

**Announced: January 30    Reservations Due By: March 31**

Through the 1970s, the Paducah shops of the Illinois Central rebuilt worn out EMD GP7 & GP9 locomotives into the GP10. The InterMountain Railway Company HO Scale GP10 locomotive will be manufactured with finely molded parts that have been designed to reproduce railroad specific details; such as Horst Air Filter, Frogeyes Nose Headlight, Extended Right-front Tool Box, & Engine Access Hatches on the roof.
