PS-1 60' Boxcars

ADVANCE RESERVATION

Eight colorful paint schemes of the HO 60' PS-1 boxcar are now available for Advance Reservation. Four of the schemes are old favorites, while the other four schemes are all new for InterMountain®. All of these models feature laser sharp decoration, multiple road numbers, metal operating knuckle couplers, and precision InterMountain® metal wheel sets. Please submit your advance reservations by August 31, so IMRC can determine interest in production.

Beginning in the 1960's, automakers approached rail carriers with the desire for larger freight cars to transport auto parts from suppliers to manufacturing centers. In response, the 60' auto parts boxcar was introduced. Carrying a wide variety of auto components including engine blocks, transmissions, brake drums, and others, these cars were a fixture throughout North America for the next four decades and can still be found in service today. As the auto industry supply chains consolidated, many of the 60' boxcars were used in other markets and could be found hauling a variety of goods including appliances, paper goods, and cardboard.

ALL NEW TO OUR HO CATALOG - TRINITY 5161 COVERED HOPPER

Ten road names of the HO 5161 hopper car will be shipping in early July. All models feature laser sharp decoration, Kadee® operating knuckle couplers, precision InterMountain® metal wheel sets, and multiple road numbers. Be sure to confirm your Advance Reservations early as some items are in short supply.

In the early 1990s America's covered hopper fleet began to show it's age. Many hoppers were already approaching 30 years of service and were limited in capacity. The times were changing; shippers and the railroads demanded higher capacity covered hoppers for a new era of railroading. Unit trains of covered hoppers were becoming the norm. Trinity responded with a new design boasting 5,161 Cubic Feet of capacity. Their design served a number of key markets, including grains, fertilizers, petrochemicals, incorporating different loading hatches and outlet gates. Many North American railroads adopted the Trinity 5161 covered hopper design into their unit trains. These cars are still rolling in service today and InterMountain® is proud deliver this ubiquitous railcar in two major body variants not offered in plastic until now.
